

OPTI WEEDER

accurate and efficient mechanical weeding in potatoes

- Innovative Danish solution for mechanical weeding of crops growing on ridges.
- Available width: 2/4/6/8 rows.
- Large capacity.
- Easy and flexible adjustment.
- Simultaneous weeding of more establishment sets.
- Weeding before sprouting.
- May be combined with *Crown Crusher* - mechanical growth stop in potatoes.

*Advantages of **OPTI WEEDER**:*

- Swift weeding - 10-25 km/hour.
- Gentle towards crops, no root damages.
- Accurate weeding 1 cm from the crop. Weeding between plants, on side slopes and in curves. Efficient against tough root weeds.
- Flexible in terms of row width and extra functions.
- 6- and 8-rows machines available with fixed or variable frame.
- 6-rows machine with flexible frame weeds establishment sets of 2+2+2.
- 8-rows machine with flexible frame weeds establishment sets of 2+4+2.
- Ergonomic. Easy adjustment and maintenance.
